3. Fill in the blank: Social engineering is a manipulation technique that exploits _____ error to gain access to private information.

1 / 1 point

- ☒ human
- ☐ computer
- ☐ coding
- ☐ network

✓ Correct

4. A security professional is asked to teach employees how to avoid inadvertently revealing sensitive data. What type of training should they conduct?

1 / 1 point

- ☐ Training about security architecture
- ☐ Training about network optimization
- ☐ Training about business continuity
- ☒ Training about social engineering

✓ Correct

5. Which of the following tasks are part of the security and risk management domain? Select all that apply.

1 / 1 point

- ☒ Business continuity

✓ Correct

- ☐ Securing physical assets
- ☒ Defining security goals and objectives

✓ Correct

- ☒ Compliance

✓ Correct

6. Which of the following tasks may be part of the security architecture and engineering domain? Select all that apply. 1 / 1 point

- ☐ Validating the identities of employees
- ☒ Ensuring that effective systems and processes are in place

✔ Correct

- ☐ Securing hardware
- ☒ Configuring a firewall

✔ Correct
